SUMMARY

Frontend Developer building production web applications with React, Next.js, and TypeScript. Delivered a live booking platform with payment gateway and IoT integration, corporate websites, and admin, ERP, financial, and education dashboards (including bilingual Arabic/English). Strong in API integration with React Query, reusable component systems with Tailwind CSS and ShadCN/UI, and responsive, performance-focused UI. Comfortable working with designers and backend engineers in Agile teams, locally and remotely.

TECHNICAL SKILLS

Core: React, Next.js (App Router, Server/Client Components), TypeScript, JavaScript (ES6+), HTML5, CSS3

UI & Forms: Tailwind CSS, ShadCN/UI, React Hook Form, Zod, FullCalendar, Arabic/English (RTL) interfaces, Modular Architecture

State & Data: React Query, Zustand, Redux, Context API, REST APIs, JSON

Tools: Git, GitHub, VS Code, npm/yarn, Figma (design handoff), Node.js & Express (basic)

PROFESSIONAL EXPERIENCE

Frontend Developer — SB Technology (Full-time) Dec 2024 – Present

Cairo, Egypt

- Build and maintain production Next.js and React applications in TypeScript, including a booking platform, corporate websites, and admin and financial dashboards.
- Created a reusable component library with Tailwind CSS and ShadCN/UI to speed up feature delivery and keep UI consistent across projects.
- Integrated REST APIs and managed server state, caching, and async data flows with React Query.
- Worked in Agile sprints with designers and backend developers to ship responsive, maintainable features.
- Applied performance and accessibility practices: optimised rendering, responsive layouts, and clean component architecture.

Freelance Frontend Developer Jun 2024 – Present

- Delivered responsive web interfaces for independent clients using React, Tailwind CSS, and modern JavaScript.
- Implemented form validation and state management with React Hook Form, Zod, and React Query.
- Built reusable UI components and integrated APIs for dynamic web applications.

PROJECTS

Luca Stay — Booking Platform (Production) | lucastay.it

Tech: Next.js, TypeScript, Tailwind CSS, ShadCN/UI

- Built the frontend of a live booking platform with two reservation flows: suites and workspaces.
- Developed dynamic booking calendars, availability management, and end-to-end reservation flows.
- Integrated the Nexi payment gateway for secure online payments.
- Connected IoT control systems so guests can manage smart apartment features from the interface.
- Structured the app with Next.js routing and a server/client component split for an optimised frontend.

Luca Stay — Admin Dashboard

Tech: React, TypeScript, Tailwind CSS, React Query, Modular Architecture

- Built the back-office dashboard for Luca Stay to manage reservations, buildings, apartments, and services from one interface.
- Used React Query for data fetching and caching, and a modular architecture to keep each management area isolated and easy to extend.

Karat — Digital Gold Dashboard

Tech: React, TypeScript, Tailwind CSS, React Query, Modular Architecture

- Built a dashboard for a digital gold platform covering three flows: buying, selling, and gifting gold.
- Implemented full financial management for each flow, giving admins clear visibility into transactions and balances.
- Organised the codebase into feature modules with typed data layers (TypeScript) and React Query for server state.

PASS Citizenship & Residency (Production) | passresidency.com

Tech: Next.js, TypeScript, Tailwind CSS, ShadCN/UI

- Developed a corporate website for global mobility and citizenship services, with a focus on performance, accessibility, and responsive UI.

PASS Wealth Management (Production) | passwm.com

Tech: Next.js, TypeScript, Tailwind CSS, ShadCN/UI

- Built a corporate website presenting investment and residency services, with a responsive design and clean UI architecture.

Academies ERP Dashboard

Tech: React, TypeScript, Tailwind CSS, ShadCN/UI, React Query

- Developed a bilingual (Arabic/English) ERP dashboard covering analytics, session scheduling (FullCalendar), trainee management, and finance.
- Built authentication with sign-in, password recovery, and role-based access.

G2G Educational Dashboard

Tech: React, TypeScript, Tailwind CSS, ShadCN/UI, React Query

- Built a dashboard for managing educational content across multiple grades, with OTP-verified authentication.
- Developed a curriculum and lesson management system supporting video, audio, and document uploads.

Homes Admin Dashboard

Tech: React, TypeScript, Tailwind CSS, React Query, ShadCN/UI

- Building an admin dashboard for managing real estate investment shares, with data dashboards, property management, and financial tracking.
- Using React Query caching and data-fetching strategies for performance, with reusable components and scalable state management.

EDUCATION & TRAINING

B.Sc. Communications and Electronics Engineering - Graduated June 2020

Modern Academy for Engineering and Technology, Cairo, Egypt

Training Program — National Telecommunication Institute (NTI) Oct 2023

New Capital, Egypt

MILITARY SERVICE

Completed — Officer & Communications Engineer, Egyptian Armed Forces Oct 2020 – Apr 2023
